

THIS IS EUROMOT

Euromot is the European Association of Internal Combustion Engine Manufacturers. It is a non-profitmaking organisation to serve the interests of the ICE manufacturers supplying the EU market.

Euromot is a centre of excellence and knowledge for the ICE industry in all matters related to worldwide product regulation, operating at a pre-competitive level. It promotes the central role of the internal combustion engine in modern society, reflects the importance of advanced technologies to sustain economic growth without endangering the global environment and communicates the assets of ICE power to regulators and trade media.

OUR MISSION IS

1 to be the authoritative voice of the internal combustion engine industry in regulatory matters so as to be recognized by the key regulatory bodies and to achieve a pro-active engagement in international harmonisation of regulations.

In this context the Association's primary role is:

- to implement working group structure to enable the discussion and development of Euromot policy / position on regulatory issues reflecting consensus opinion of members.
- to seek an open and fair dialogue with regulatory bodies in Europe and worldwide.
- to co-ordinate with Trade Associations of the nonroad, marine and power generation industry sector in engaging with regulators on engine issues.

2 to be the credible source of information for engine industry, equipment manufacturers, legislator and media with regard to current and future requirements affecting internal combustion engines.

In this context the Association's primary role is:

- to collect and disseminate information concerning current and future regulatory requirements.
- to promote advanced internal combustion engine technologies.
- to provide reliable facts & figures on the essential role and economic importance of ICE power.

3 to be the sought-after center of knowledge and forum for debate for the internal combustion engine industry.

In this context the Association's primary role is:

- to consult members in developments in regulation and indicate potential significance.
- to provide a forum for members to raise and discuss issues affecting the industry.
- to provide a forum for members and their customers in the nonroad sector to raise and discuss cross-industry issues.
- to co-ordinate pre-competitive cost-sharing technology research projects.
- to help emerging markets to make progress in the reduction of emissions and promote implementation of internationally harmonized regulations.

**TO ACCOMPLISH THE
ENGINE-IN-SOCIETY CLAIM
WE BELIEVE ...**

... that the internal combustion engine continues to play a critical role in society. For more than 100 years it has played a central role in our economic and social developments. More recently the increasingly densely populated and developed nature of our society has created new environmental demands. Our industry has responded to the challenge. In the last 50 years engineers in our industry and related businesses (users and suppliers) have through their creativity developed new technologies which made possible a dramatic reduction in the environmental impact that arises from the use of the internal combustion engine enabling it to retain its role as society's most economic and versatile power source.
